Skin and Hair Regenerative Solutions

DERMOAROMA®

DermaFocus
REGENERATIVE AESTHETICS

What are Purasomes?

Purasomes are a groundbreaking range of aesthetic solutions and supplements that harness the power of **AMPLEX Plus Technology**. This patented innovation utilises **ethically sourced bovine colostrum**, rich in **exosomes, growth factors**, and other active ingredients, to deliver therapeutic and transformative treatments.

Exosomes

Exosomes deliver essential proteins and natural molecules to cells, enhancing their performance. Harnessing the body's own healing mechanisms, they improve skin health and support tissue repair. When used on the scalp, they stimulate follicles and promote stronger hair growth.

Growth Factors

Growth factors are proteins that help cells to function properly all over the body. They play a vital role in skin repair and regeneration, contributing to healthy skin and hair.

SKIN AND HAIR SUPPLEMENT

purasomes XCELL

What is XCell?

XCell is an advanced daily supplement designed to restore balance and support not just skin health, but also overall physical wellness, immune system function and gut health – all in one easy-to-use oral spray.

What's Inside?

Purasomes XCell is powered by bovine colostrum—its most important ingredient—combined with natural, bioactive nutrients that enhance cell performance.

Key Benefits

- ✓ Restores skin glow and texture
- ✓ Promotes hair growth and strength
- ✓ Reduces inflammation and supports gut health
- ✓ Strengthens the immune system
- ✓ Maintains healthy telomere length

Easy to Use

- Just 3 sprays under the tongue, twice a day
- No pills to swallow
- 60-day supply per bottle

Purasomes & Microneedling

The Purasomes are applied with microneedling creating tiny punctures in the skin's surface which are essential for the absorption of the product into the skin.

Purasomes can be used as a standalone treatment or in combination with other energy-based devices, laser treatments, chemical peels, PRP (platelet-rich plasma) and other aesthetic treatments. They can also be used alongside polynucleotides to fully optimise results.

purasomes

Purasomes offers three specialised formulations designed to improve skin and hair. Each combines ethically sourced bovine colostrum with active ingredients and essential nutrients to treat different indications.

Purasomes are applied using microneedling to help the product absorb into the skin. They can be used on their own or combined with other aesthetic treatments for enhanced results.

Treatment Benefits

Treatment Protocols

purasomes NC150+

Skin Nutri Complex

Stimulates fibroblasts, boosting collagen and elastin production and promoting formation of new blood vessels.

- Regenerates and renew damaged skin
- Improves hydration
- Enhances overall texture and tone

A series of 3 treatments every three to four weeks.

purasomes SGC100+

Skin Glow Complex

Regulates melanin production and provides antioxidant protection against UV rays.

- Improves pigmentation and age spots
- Enhances skin brightening and luminosity
- Minimises the appearance of scars and lesions

A series of 3 treatments every three to four weeks.

purasomes HSC50+

Hair & Scalp Complex

Revitalises the scalp, reactivates the hair bulb, and energises hair follicles for healthier growth.

- Restores hair growth
- Hydrates the scalp
- Reduces shedding
- Strengthens hair

A series of 4 to 6 treatments every three to four weeks.

Your questions answered

How will I know if Purasomes treatment is suitable for my skin condition?

Purasomes treatment is suitable for various skin types, different skin conditions and all ages. The Purasomes range offers a broad spectrum of solutions to your needs. Consult with your aesthetic practitioner to determine the most suitable treatment for you.

Is Purasomes treatment safe?

It is a safe treatment with no major side effects, however, it is normal to experience redness and skin sensitivity. The downtime may vary if combined with other medical devices (EBD, laser, chemical peels). Before treatment, speak to your aesthetic practitioner about pre-existing medical conditions or sensitivities.

When will I see the results?

After a series of three to five Purasomes treatment sessions, patients can expect to see significant improvement in their skin and hair concerns, with results expected to last 9 to 12 months.

Individual results may vary, always consult a practitioner.

Will the treatment affect my daily routine?

The downtime for the treatment is minimal, and patients can return to their usual skincare routine after 48 hours. However, following your specialist's post-treatment care instructions is advised for optimal results and comfort.

Can Purasomes be used in combination with other treatments?

Purasomes can effectively penetrate the skin through in-clinic microneedling as a standalone treatment or in combination with other aesthetic procedures.

What do I need to consider when choosing a Purasomes practitioner?

It is important to look for a clinic or healthcare professional who is well-trained in aesthetic treatments with a medical background, such as a doctor, nurse, or dentist.
